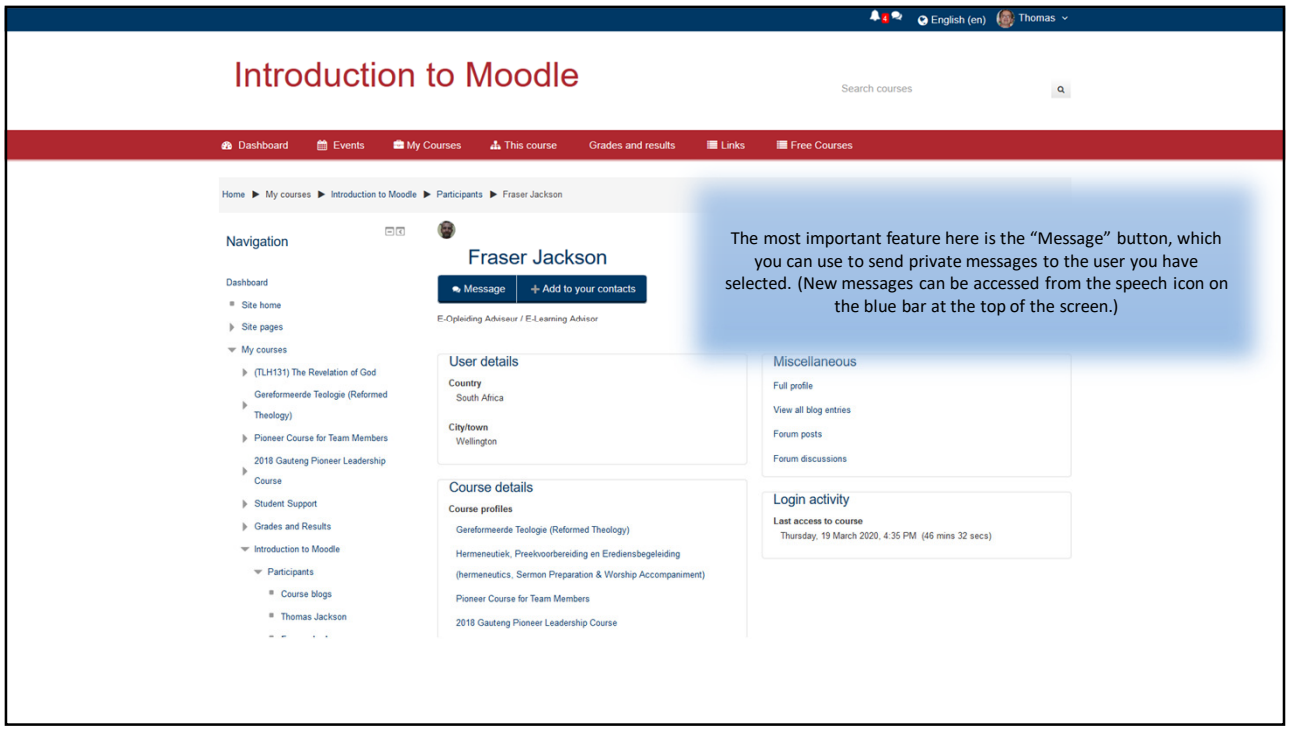
Here you have a list of the other members of your course.
You can click anybody's name to find out more – for example
"Fraser Jackson"



The most important feature here is the "Message" button, which you can use to send private messages to the user you have selected. (New messages can be accessed from the speech icon on the blue bar at the top of the screen.)

Chats – here you can enter a text-based chat with your entire class at a pre-arranged time. Chats take place in real time.

Forums – your tutor will use these to start discussions which all students are expected to contribute to. Forums are usually not in real time – you may be given a week or more to make a contribution.

Resources such as PDF files, powerpoints, word documents, images (all pictured here) or other types such as web-links and videos are available for download.

We will try to show the size of every file we make available so that you know how big a download it is going to be.

Instead of uploading videos, we will try as far as possible to link to Hugenote Kollege's youtube channel, where you can choose what quality of video to watch depending on your internet connection.

Please take the time now to login to the site at http://mynotes.hugenote.com:85 and explore.

When you are ready, restart the video to find out about using the Moodle app.

There is a mobile app which you can download instead of using your browser:

Android: https://play.google.com/store/apps/details?id=com.moodle.moodlemobile

Apple: https://itunes.apple.com/us/app/moodle/id633359593?mt=8

Windows 10: https://www.microsoft.com/en-za/p/moodle-desktop/9p9bwvhdc8c8

There are two reasons to download the app:

1. the convenience of having it on your phone or tablet
2. you can download the course while you have access to the internet then work offline

We will use the Windows 10 version of the app

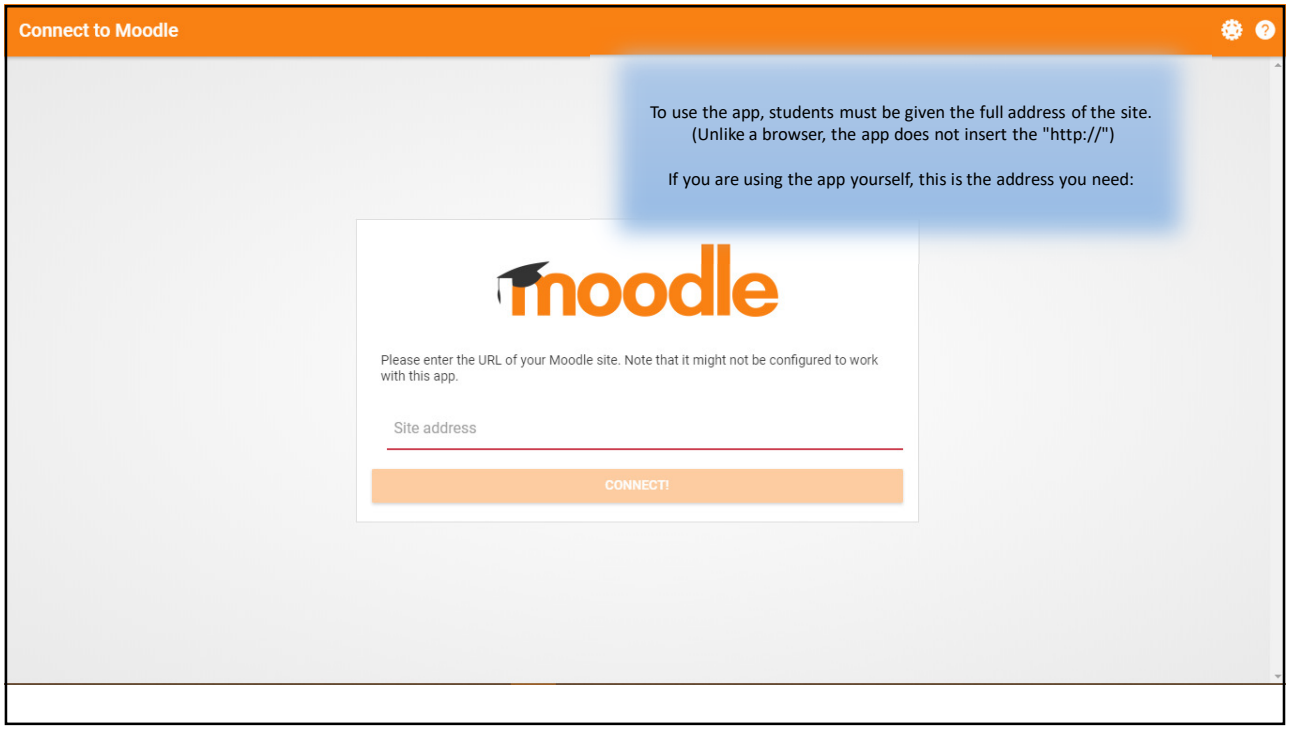
Language
English
Enable text editor
If enabled, a text editor will be available when entering content.
Display debug messages
If enabled, error modals will display more data about the error if possible.
Note that some settings are also available once you login.
The arrow in the upper left corner returns you to the login screen.



Connect to Moodle
To use the app, students must be given the full address of the site.
(Unlike a browser, the app does not insert the "http://")
If you are using the app yourself, this is the address you need:
moodle
Please enter the URL of your Moodle site. Note that it might not be configured to work with this app.
